Mountain Weather Forecast

Eryri (Snowdonia) National Park

Forecast valid from 06:00 on Sunday 28 Jan 2024 until 23:59 on Monday 29 Jan 2024

Forecast Issued on Sunday 28 Jan 2024 at 00:05

Confidence: High confidence for windy, mainly dry conditions Sunday before outbreaks of rain move in overnight. Also high for winds to ease somewhat Monday with rain likely for much of the day. However confidence is lower in where the heaviest and most persistent rain will occur, and also in the direction of the winds. Confidence is high again for a drier day Tuesday. Very low confidence in the detail on Wednesday at this stage, but likely to be a windy day with rain during the afternoon. Also low confidence for any rain later on Thursday.

Headline for Sunday 28 Jan 2024: A cloudy and very windy day but staying mainly dry until the evening.

Mountain weather hazards on Sunday 28 Jan 2024

Blizzards No Likelihood	**Heavy persistent snow** No Likelihood	**Storm force winds** Low Likelihood
Gales High Likelihood	**Severe chill effect** Low Likelihood	**Poor visibility** Low Likelihood

Precipitation probability					
10%	10%	10%	10%	30%	60%

Forecast for Sunday 28 Jan 2024

Weather: Windy, but generally dry and bright with some limited sunny spells. Thicker cloud will move in from the west during the evening with light rain or drizzle spreading to northern and western hills. Some heavier bursts likely by midnight.

Chance of cloud-free hill tops above 800m: 20%, improving to 70% during the morning but decreasing to 30% through the evening

Low Cloud and visibility: Scattered cloud obscuring hills above 500m at first, but breaking up Sunday morning and erratically lifting to leave just the odd patch above 700m. Further low cloud returning to around 500m during the evening. Visibility generally moderate to good below the cloud, but falling to poor with any evening rain.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Upland gales through daylight hours with sudden gusts up to 70mph across exposed tops and ridges such as Crib Goch, with a risk of being blown over. It's never a bad decision to wait for another day, with plenty of other routes to enjoy. Feeling chilly in the strong winds, with windproof layers essential, despite the freezing level above the tops. Very mild in the north, potentially reaching Plus 16 Celsius.

Forecast for Monday 29 Jan 2024

Weather: Cloudy with outbreaks of mostly light rain, and turning heavier for some during the morning. These continuing for much of the day, although some drier intervals likely, mainly later in the south and east

Maximum wind: Southerly 20-30mph with isolated gusts 40mph at first, becoming variable in direction through the day, but increasingly from northwest at 20-30mph.

Chance of cloud-free hill tops above 800m: 10% in northwest, 30% in southeast

Low Cloud and visibility: Broken cloud obscuring hills above 600m for much of the day, and down to 400m across northwestern hills at times. Some breaks possible in the southeast with cloud around 800m. Visibility moderate to poor with the rain and drizzle.

Temperature: **Valleys:** Plus 6 Celsius to Plus 10 Celsius
At 800m: Plus 7 Celsius
Freezing level: Above summits
